

This is MIXvoip

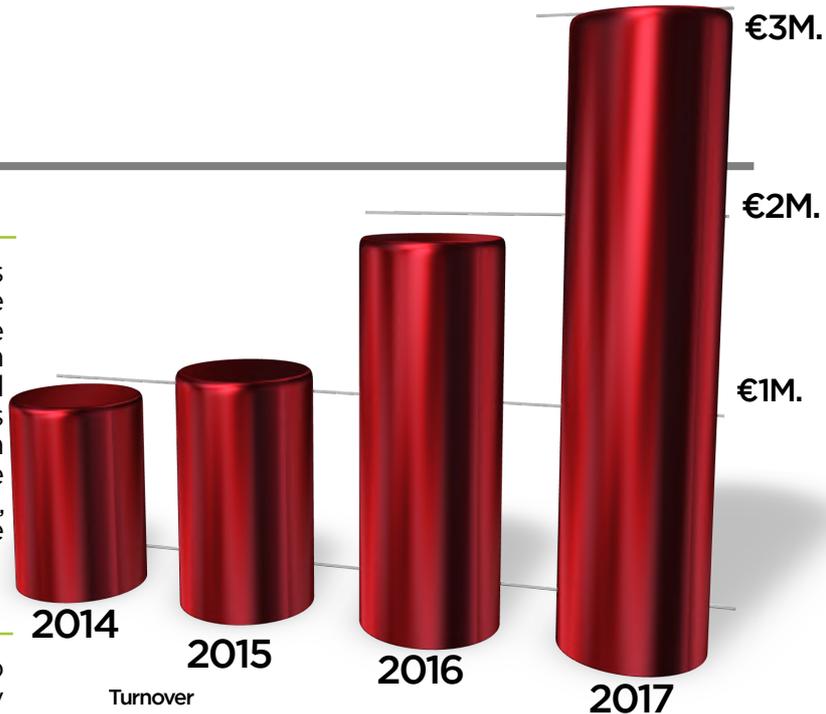

More than telephony

Regulated Telecom Provider

MIXvoip, regulated telecom provider, develops sells and installs Cloud hosted VoIP telephone exchanges (MIXpbx) and internal telephone infrastructures for business customers. Based on an attractive and competitive offer, advanced technology, and quality of service, the company's growth is constant since its foundation. In addition to business telephony MIXvoip offers flexible solutions of Videoconferencing, Business Internet, integration of access control, WiFi, and competitive SIP trunk.

40 dedicated staff

MIXvoip does not outsource its core capability to third-party suppliers, and excellence is achieved by constant in-house development. Our support by email, chat and telephone is performed by our **multilingual engineers and technicians** perfectly familiar with the expectations of professionals.

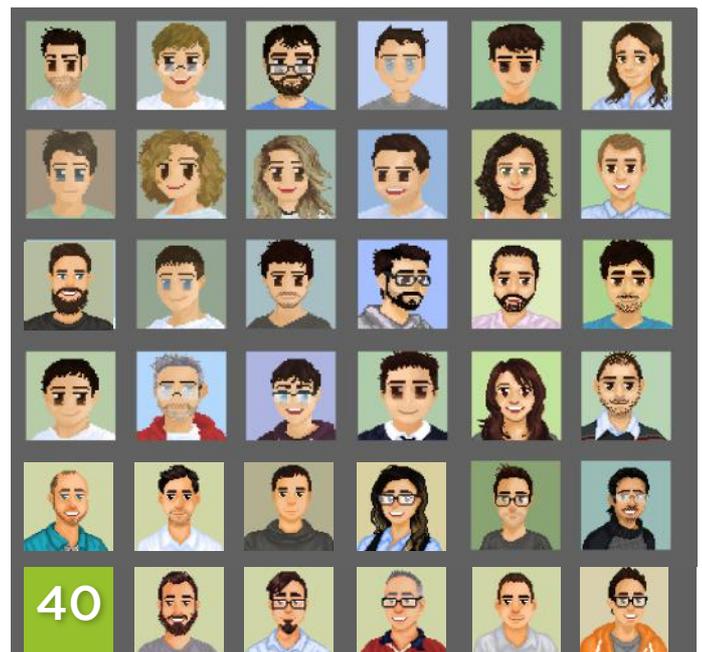

10.000.000
traffic in minutes per month

Trust of integrators

MIXvoip is the favourite SIP trunk and VoIP supplier of several integrators. Long term partnership based on solid foundation and mutual trust for the benefits of hundreds of international companies. MIXvoip is the only provider to offer **a full antifraud guarantee and policy**: any call conducted by someone not physically present on the customer's site are not to be paid by the client.

No commitment in time

MIXvoip prefers to ensure the loyalty of its customers by the quality of its service and its extremely competitive costs, rather than tie you in to a long term restrictive contract.

Loïc Didelot, founder and CEO of MIXvoip has chosen to lead his team in a direction that values high quality technology providing the best customer service possible.

« My team goes above and beyond to make customer service a TOP priority. Our clients have the choice between many providers, and we never forget that point »

+2000 customers

This is MIXvoip

More than telephony
